

# 16 REASONS

## ENERGY EFFICIENCY THROUGH SUPERIOR LIGHTING

### 16 Reasons to consider replacing existing 400 Watt Metal Halide with RAPTOR™ T5/HO luminaires from The light Edge, Inc.

- Reduce lighting energy operating costs by over 50%.
- Better color rendering = improved color = better visual acuity.
- Uniform distribution of light = no hot spots.
- Greater safety = no HID fire danger.
- Higher lumen maintenance = less output degradation = more useful light over life.
- Silent operation = no audible ballast “hum”.
- Longer lamp life. 30,000 hrs vs. 20,000 hrs at 12 hours per start.
- Less heat output = reduced cooling load requirement.
- No flicker = eliminates stroboscopic effect.
- HFP programmed start ballast = no delay starting.
- Instant on/off allows for the use of occupancy sensors.
- Replacement lamps cost 50% less than HID.
- Extruded anodized aluminum vs. sheet metal.
- Quick install = less labor cost.
- Easy to maintain = LOWER maintenance costs.
- Standard 5 year fixture warranty.

**SAVE ENERGY – SAVE MONEY**
